  - Assess and fund capital needs in older buildings in the HSH portfolio.
Other Key Updates:
2022 Point-in-Time Count
What is the PIT Count?

HUD requires that Continuum of Care (CoC) grantees conduct a Point-in-Time (PIT) Count of all persons experiencing homelessness at least once every other year.

HUD also requires that CoCs report on available housing and shelter resources dedicated for homeless people as of the night of the PIT in the Housing Inventory Count (HIC).
Components of the PIT Count

Sheltered Count
Count of homeless individuals and families staying in emergency shelters and transitional housing

Unsheltered Count
Visual count of unsheltered homeless individuals and families sleeping outdoors, in tents, in vehicles, or other places not meant for human habitation

Survey
Interviews with a representative sample of sheltered and unsheltered people to understand population demographics and characteristics
2022 PIT Count

- The last full (sheltered & unsheltered) PIT count was held on January 24, 2019
  - San Francisco, like many communities, was granted an exception from conducting the 2021 Count due to COVID-19 health and safety risks
- San Francisco’s 2022 PIT and HIC Counts reflect data as of February 23, 2022
What is the PIT Count used for?

The PIT Count...

• Increases our understanding of local needs
• Impacts funding for homeless services and meets federal reporting requirements
• Generates nationwide data regarding individuals and families experiencing homelessness
• Drives program and policy decisions

Limitations:

• Captures a “snapshot” of one single night only
• Difficulties identifying homeless individuals visually
• Does not count certain living situations (doubled up, couch surfing, etc.)
Report Milestones

February 23 – PIT Count
Count of unsheltered homelessness is conducted. Data is compiled in subsequent weeks for sheltered count and HIC as of the night of 2/23.

Survey administered in March 2022.

May 16 – Media Release
Key findings are announced at a press conference based on HUD data submission.

All Bay Area counties release similar figures.

Early July – Full Report
Full written PIT Report, Youth Count Report, and Executive Summaries are published to HSH website.

Includes supplemental data not reportable to HUD and survey findings.
PIT Count Preliminary Findings

As of May 2022
Unsheltered Homelessness

- 4,397 people were unsheltered on the night of the PIT, representing a 15% decrease since 2019
- The decrease corresponds with a significant increase in housing and shelter resources
Total Homelessness

- Total homelessness (sheltered + unsheltered) decreased by 3.5% since 2019 from 8,035 to 7,754
- This represents a 9% reduction in homeless households*

*Households include families with children and adult couples
Sheltered Homelessness

- 3,357 people were living in shelter, an **18% increase** since 2019
- This corresponds with a substantial increase (24%) in available shelter beds
- Shelter settings include emergency shelters, transitional housing, Navigation Centers, SIP Hotels, stabilization units, and winter shelters
Unhoused people were more likely to be sheltered in 2022.

43% of the homeless population was sheltered in 2022 compared to 36% in 2019.
There were 2,691 chronically homeless people in 2022 compared to 3030 in 2019, a reduction of 11%.

San Francisco’s homeless population was less chronically homeless in 2022, at a rate of 35% in 2022 compared to 38% in 2019.
Homeless families declined 1% since 2019 from 208 to 205 households. This decline was observed despite new efforts in 2022 between HSH and nonprofit providers to identify unhoused families.
Youth Households

- Unaccompanied youth (age 24 and under) decreased **6%** since 2019 from 1145 to 1073.
- Parenting youth households decreased **47%** since 2019 from 36 to 19.
The total number of homeless veterans remained flat, with 608 homeless veterans in 2019 and 605 homeless veterans in 2022.

Veterans were more likely to be sheltered in 2022; 19% of homeless veterans were sheltered in 2019 compared to 33% in 2022.
Other Key Updates:
Unit-Level Inventory Project
Unit Level Inventory (ULI) Project

- **ONE System** is the source of truth for City’s homelessness work.

- ULI project **adds PSH portfolio** to ONE: first time we’ll have comprehensive picture of our inventory.

**Functionalities:**

- Integrate and **accurately track** housing referrals, enrollments, capacity, occupancy, unit characteristics, amenities, funding sources and eligibility.

- Streamlines process for increased efficiency, including ability quickly refer the highest-priority clients to specific available units that meet their needs.
Fulfils recommendation from BLA to add unit inventory to ONE.

HSH and ONE System vendor (Bitfocus) launched ULI project in 2020.
  • Development and implementation slowed by the pandemic.

San Francisco is the first community in the nation to build this functionality into its centralized Homelessness Management Information System (HMIS).

Success will rely on quality of data entry from providers:
  • HSH Data Quality Action Plan
ULI Project: Current Status

- **Software Testing:** conducting user testing.
- **Collecting data from providers**
  - Site and unit-level data 98% complete
  - Developing templates/process to collect data on clients in each unit
- **Communicating high-level roll-out plan and timeline:**

  - **Phase 1/Pilot:** ~100 units at one hotel
    - Summer 2022
  - **Phase 2:** ~2,000 HAT Referral units
    - Fall 2022
  - **Phase 3/Full Roll-Out:** ~7,000 units
    - Early 2023
Strategic Planning Update

**Coordinated Entry Evaluation:**
- **Findings** and **next steps** will be shared at July LHCB meeting

**Just Home Project:**
- $775,000 over two years to provide **housing to justice-involved people**
- MacArthur Foundation and Urban Institute initiative

**State Planning: Input**
- Required Homelessness Action Plan for state **Homeless Housing, Assistance, and Prevention (HHAP) Program** is being finalized.
- Special LHCB meeting on June 24, 2022 to review and receive community input.
